#### Jeffrey Toobin: October 2015

##### The Supreme Nine: Black Robed Secrets

Brought Down a President; The Run of His Life: The People vs. O.J. Simpson; and Too Close to Call: The 36-Day Battle to Decide the 2000 Election.

Jeffrey Toobin joined CBB from ABC News, where, during his six-year tenure as a legal analyst, he provided legal views on the nation's most provocative and high profile cases, including the O.J. Simpson civil trial and the Kenneth Starr investigation of the Clinton White House. Toobin received a 2001 Emmy Award for his coverage of the Elian Gonzales custody saga.

Toobin is a staff writer at The New Yorker and has been covering legal affairs for the magazine since 1993. He has written articles on such subjects as Attorney General John Ashcroft, the 2001 dispute over Florida's unfettered

Author of the critically acclaimed best seller, *The Nine: Inside the Secret World of the Supreme Court*, Jeffrey Toobin brings the inside story of one of America's most mysterious and powerful institutions to the Saroyan stage. At the podium, Toobin is an unbiased, deeply analytic expert on American law, politics and procedure.

1. Open the HTML and CSS files, and run the HTML file:  
  
/toobin.html  
styles/speakers.css
2. Include a 30-degree gradient in the header section. Add a border below the header and float the logo to the left side. Adjust the space inside the header and around the logo.
3. The h3 in the header is italicized and add a CSS text-shadow to "75<sup>th</sup>".
4. Float the section inside the main element to the right side. Apply a width and some padding to this section. Then, float the sidebar to left side.
5. Apply two-column formatting to the article using the column-count property. If this creates any formatting problems, adjust the CSS so the page looks like the one above.
6. The h2 inside the section element should span across all columns. Apply padding to this element as well.

7. Float the image inside the article to the left and adjust the space around the image. Use CSS to set the width of the image to 275 pixels so it fits in one column and add a black border to it.
8. Adjust the padding for different headings and images inside the sidebar.
9. Set the width of sidebar to 215px and adjust its padding as necessary. Set the width of section to 575px.
10. When hovering over all the links, they should be italicized.
11. The text inside the footer is center aligned and has a white text color. Footer element should clear both sides.
12. Add the normalize style to the styles folder.
13. Some elements' styles are provided in speakers.css file.

The finished page should look like the image above.
